MEMPHIS, TENNESSEE | LOCAL IMPACT REPORT

OVERVIEW

Colossus I and Colossus II are **among the world's largest and most advanced** supercomputers. In Memphis, SpaceXAI operates Colossus I (785,000 square feet with 220,000+ GPUs) and Macrohard and Minihard (one million+ square feet with hundreds of thousands of additional GPUs as part of Colossus II). SpaceXAI continues to make considerable investments in enhancing and expanding these facilities while supporting the local Memphis community.

SERVING MEMPHIS

SpaceXAI has invested more than $45 billion in Tennessee. In Memphis, that means jobs, tax revenue, and investment in the community.

THE NUMBERS

$45B+

SpaceXAI Investment

$50M+

Estimated 2026 tax revenue for schools, police, fire, parks

700

Additional full-time jobs in Memphis and Southaven by end of 2026

OVERVIEW

01 **Local jobs**

SpaceXAI expects an additional **700 full-time employees** in Memphis and Southaven by the end of 2026, and currently has about 7,500 contractors on site across the two states.

02 **Tax revenue that stays with the city**

SpaceXAI expects to pay over **$50 million in taxes** in 2026 as one of the largest taxpayers in Memphis, if not the largest. Memphis has designated **25%** of SpaceXAI property-tax revenue to South Memphis & Whitehaven. SpaceXAI does not take key Tennessee tax credits, so the money stays with the city for police, fire, schools, and parks.

03 **Community engagement**

SpaceXAI is establishing a Community Relations Team in Memphis and is developing a strategic plan in consultation with community leaders for ongoing community partnerships and investments. So far this year:

- **$5 million** in renovations at local high schools, including new locker rooms and HVAC systems
- **$100,000** to Uplift Westwood for STEM classroom education and activities, local athletics, and pre-sport meals
- **50% off Starlink** Residential plans for new and existing customers, with about 2,000 members of the community already signed up
- Establishing **$10,000 scholarships** to graduating seniors interested in pursuing further education in technology and STEM
